

# EXACT SCIENCES FAST FACTS

Exact Sciences is a leading global cancer diagnostics company, with more than **5,500 employees worldwide.**

Exact Sciences' workforce is located at **15 sites** worldwide, with headquarters in Madison, Wisconsin. We have additional offices in Redwood City and San Diego, CA; Phoenix, AZ; Salt Lake City, UT; Cambridge and Boston, MA; Baltimore, MD; Paris; Milan; London and Oxford, England; Tokyo; Cologne, Germany; and, international headquarters near Zug, Switzerland.

Exact Sciences' portfolio of cancer diagnostics tests are performed in **5 clinical laboratories** in Madison, WI; Redwood City, CA; and, Phoenix, AZ. They are certified under the Clinical Laboratory Improvement Amendments (CLIA) and accredited by the College of American Pathologists (CAP). The lab in Redwood City, CA is an ISO 15189:2012 Internationally-Recognized Accredited Laboratory for Clinical Testing.

Exact Sciences consistently tops Fortune's Great Place to Work™ certified lists. In 2020, 90% of employee survey participants said **Exact Sciences is a Great Place to Work™** and 95% are proud to tell others they work for Exact Sciences.<sup>1</sup>

Exact Sciences' 2020 revenue was **\$1.49 billion.**<sup>1</sup>

Cologuard® is the first and only FDA-approved, non-invasive, multi-target, stool DNA-based colorectal cancer screening test. Since it was made available in 2014, Cologuard has helped screen more than **6 million people**<sup>1</sup>. For more information, visit [www.cologuard.com](http://www.cologuard.com).

The Oncotype DX® portfolio of breast, colon and prostate cancer tests applies advanced genomic science to reveal the unique biology of a tumor to help optimize cancer treatment decisions. With **more than 1.4 million patients tested in more than 90 countries**<sup>1</sup>, the Oncotype DX® tests have redefined personalized medicine by making genomics a critical part of cancer diagnosis and treatment. To learn more about Oncotype DX tests, visit [www.OncotypeIQ.com](http://www.OncotypeIQ.com).

The Oncotype MAP™ Pan-Cancer Tissue test delivers rapid, comprehensive tumor profiling to aid therapy selection for patients with advanced or metastatic cancer. Results are provided **within 3-5 business days<sup>1,2</sup> and with patient specimens as small as 3 mm<sup>2</sup> of tissue, about the size of a grain of rice**<sup>1</sup>.

The GEM ExTra® test detects damage in genes and provides a complete biological picture of certain refractory, rare, or aggressive cancers. **With an extensive exome (DNA) panel of approximately 20,000 genes and 169 introns**<sup>3</sup>, as well as full transcriptome (RNA) coverage, the GEM ExTra test is a comprehensive genomic panel. It provides physicians, academic medical centers, and biopharma researchers with vital interpreted information to help understand changes to a patient's genomic tumor profile and recommend therapeutic treatment plans.

Exact Sciences is shaping the future of screening by developing a test to detect multiple types of cancers at earlier stages through a single blood draw. The company aims to help close the massive screening gap that exists today in which **~70% of incident cancers have no current screening methods.**<sup>4,5,6</sup> We're also collaborating with Mayo Clinic, Johns Hopkins University, and the Translational Genomics Research Institute (an affiliate of City of Hope) to develop new cancer detection tests, including a solution for minimal residual disease (MRD) testing.

The depth and breadth of the Exact Sciences' pipeline is helping us provide several new cancer solutions to patients through the following innovative cancer diagnostics.

#### Estimated U.S. Total Addressable Market\*

- **\$25B** multi-cancer screening test
- **\$18B** Cologuard 2.0
- **\$15B** minimal residual disease & recurrence monitoring tests
- **\$3B** Oncotype MAP™ liquid test
- **\$1.5B** Oncoguard™ Liver test

Note: These tests have not been cleared or approved by the FDA, and with the exception of Oncoguard Liver, are not available for sale in the United States.
